

THE REALITY IN LACE FABRIC SIMULATION

Simulation Lace gives you a never before seen reality of lace fabric simulation. Perfect lighting, shadows, yarn surfaces, yarn models and sheen are the ingredients for creating amazing natural falls of folds. Fully interactive handling of the simulated model.

- > Based on the technical data for control of the machines
- > Detailed yarn configuration with basic material, yarn count, surfaces, filaments, sheen, opacity, multi level twisting, multi color.
- > Rich set of design functions
- > 3D measurements, magnifier, application to surfaces (fall of folds)
- > Real time fabric simulation during development
